Economic Conditions and Movement of Financial Market

In 2025, Thai economy experienced slow growth led by a decline in tourism sector declined from last year reporting the number of tourist arrivals at 33 million, decreased by 7.2% (YoY). Private consumption slowed down aligning with weak consumer confidence stemming from concerns about the slow recovery of Thai economy, high household debt level, US trade policy, and political uncertainty, as well as the impact of flooding in several provinces and the Thai-Cambodian border conflict which caused the disruption in economic activities. Nevertheless, the domestic car sales for the first 11 months of 2025 was at 546,045 units, improved by 5.3% (YoY) driven by the growth in sales of EV cars despite the contraction in pickup sales which was caused by tightened loan underwriting by financial institutions. The export sector increased as the export activities were temporarily boosted during the grace period before the imposition of US import tariff rate at 19%. Government spending was accelerated towards the end of the year through economic stimulus measures namely "Half-Half Plus" program. Headline inflation for the year 2025 declined by 0.14%, driven by lower oil prices.

During the year 2025, the Bank of Thailand (BOT) cut the policy rate in total of 4 times from 2.25% at the end of 2024 to 1.25% to support the economic recovery and ease the debt burden of borrowers. Thai commercial banks also decreased lending rates and deposit rates to be in alignment with the BOT's guideline. Comparing to the year 2024, the lending rates of Top 4 commercial banks declined in all rate types. The average minimum lending rate (MLR) decreased from 6.98% to 6.47%. The average minimum overdraft rate (MOR) decreased from 7.32% to 6.46%, and the average minimum retail rate (MRR) decreased from 7.20% to 6.73%. The average 3-month fixed deposit rates of Top 4 commercial banks decreased from 0.99% to 0.69%.

In addition, The Bank of Thailand, in collaboration with financial institutions, provided debt assistance "You Fight, We Help" program for fragile customers in retail and SMEs sectors. The program aimed to provide debt restructuring, alleviate debt burdens, and improve credit histories, allowing these individuals and businesses to re-enter the credit system. Moreover, the BOT launched the "Clear Debt Fast & Move Forward" program by acquiring and transferring the NPLs of retail borrowers from the original creditors to Sukhumvit Asset Management (SAM) and restructuring the debt leniently to reduce the debt burden for borrowers. The program will commence on January 1, 2026.

The capital market of 2025 was highly volatile caused by weak investor confidence which stemmed from a slow domestic economic recovery, the political uncertainty, and a concern about US trade policy. SET index closed at 1,259.67 points, decreased by 140.54 points or 10.0% from the previous year. Market trading volume dropped with the average daily turnover decreased from 45,079.67 million baht in the previous year to 40,493.55 million baht.
